

# Recycled Art: Egg Carton Octopi

## Materials

- Egg carton
- Paint or markers
- String (yarn, ribbon, anything dangly for the tentacles)
- Scissors
- Paper
- Glue

## Instructions

1. Get an empty egg carton and use scissors to cut out however many of the bubbles that you would like to use.

2. Use your paint or markers to color the outside of the egg carton bubble (the hole that holds the egg is the inside). Make sure you add eyes and a face to your octopus!

3. Cut 9 pieces of string and use 8 of them for the tentacles of the octopus.
  - a. You are going to glue those 8 pieces to the inside of the egg carton bubble, so that they hang out from under the bubble like in the picture above!
  - b. Use the last piece of string to glue to the outside of the bubble, on the top of its head, so you can hang your octopus around the house!
  - c. Make as many of these as you can/want!
